SUMMARY

Results-driven **Frontend Developer** with 6 **years of experience** specializing in scalable, high-performance web applications. Expert in **React.js, Next.js, and TypeScript**, with a proven track record of transforming complex Figma designs into immersive, pixel-perfect user interfaces. Adept at integrating cloud-based backends (**Firebase, Appwrite**) and optimizing frontend performance to drive user engagement and business growth.

TECHNICAL SKILLS

- **Languages/Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3.
- **Frameworks/Libraries:** React.js, Next.js, Redux Toolkit, Context API, Zustand, GSAP (Animations)
- **Styling:** Tailwind CSS, Material UI, Chakra UI, Bootstrap.
- **Backend:** Firebase (Firestore/Auth), Appwrite(Database/Storage/Auth), REST APIs.
- **Tools:** Figma, WordPress, WIx.
- **Platform:** Linux, Git, GitHub, Vercel, VS Code.

PROFESSIONAL EXPERIENCE

Frontend Developer (Volunteer) | London Jewish Forum (UK)
January 2026 – Present

- **Engineered a high-performance "Pledge Tracker"** for the 2026 London Local Elections, featuring borough-based filtering and interactive data tables to monitor candidate support in real-time.
- **Refactored site-wide navigation and specialized event sub-pages**, optimizing mobile responsiveness and integrating complex document portals to streamline community access to manifestos and branding-aligned UI.

Frontend Developer (Internship) — Achota Limited
June 2024 – July 2025

- **Architected and deployed** scalable, API-driven JavaScript applications, integrating **Firebase Firestore** for real-time data synchronization and secure user authentication.
- **Engineered** a library of reusable, visually consistent UI components using **React, Tailwind CSS, and Material UI**, significantly enhancing code maintainability and system responsiveness.

Frontend Engineer (Freelance)
June 2020 – July 2024

- **E-commerce (Canine Sales):** Developed a niche marketplace focusing on high-conversion UI and automated inquiry systems, facilitating seamless international buyer communications.

Link: Van Marjoli

- **Industrial Service Platform (KMK Techniques):** Engineered a mobile-first HVAC booking system using a modular component architecture, ensuring 100% responsiveness across all device types.

Link: KMK Techniques

- **Vehicle Marketplace (Shurmans):** Strategic lead on a technical migration to a WordPress environment, empowering the client with custom-built inventory management tools while maintaining a high-fidelity frontend.

PROJECTS

Caped – E-commerce Web Application | 2026

Developed a high-performance, mobile-first e-commerce platform featuring dynamic product categorization, intuitive navigation, and a "seamlessly artistic" UI optimized for maximum user engagement.

- **Architected** a high-performance storefront using **Next.js, Tailwind CSS, Shadcn and TypeScript**, adopting strict data contracts to eliminate runtime errors and ensure scalability.
- **Integrated Appwrite** for a "backend-less" workflow, managing secure user authentication, session handling, and protected routing for admin dashboards.
- **Streamlined state management** with **Zustand**, replacing Redux to reduce boilerplate and optimize real-time cart functionality and UI updates.
- **Engineered** a modular **Tailwind CSS** component library from Figma designs, utilizing **Next.js Dynamic Routing** for SEO-optimized, on-demand product rendering.

Link: Caped

Muhameds – Ecommerce website | 2025

- **Developed a full-scale e-commerce platform** utilizing **React Context API** for seamless real-time cart management and secure checkout logic.
- **Engineered a custom Dark/Light mode system** and optimized asset delivery to ensure high-speed rendering and accessibility on **low-bandwidth connections.**

Link: MedLabs

Jobber – Career Portal (2025)

- **Engineered a dynamic job search engine** utilizing the **Adzuna API** for real-time live listings and high-performance data fetching.
- **Developed a custom multi-category filtering system** and a secure employer portal for job postings, leveraging a **JSON-server architecture** for efficient data management.

Link: Jobber

HTC Booking – Travel & Hospitality Platform (2025)

- **Engineered a high-traffic travel booking SPA** using **React and Tailwind CSS**, integrating the **TripAdvisor API** for real-time dynamic data fetching.
- **Implemented interactive Leaflet.js mapping** and complex **GSAP animations**, creating an immersive, "storytelling" user journey with high-performance UI transitions.

EDUCATION

B.Eng. in Computer Engineering
Michael Okpara University of Agriculture, Umudike | *Graduated: Oct 2024*

- **Grade:** 3.54 / 5.0 (Second Class Upper Division)
- **Engineering Foundation:** Applied core engineering principles to software development, focusing on modular architecture and system efficiency.
- **Extracurriculars:** Engaged with **GDG on Campus MOUAU**, participating in developer circles to master modern web technologies and agile methodologies.
