SUMMARY

I'm a results-driven **Frontend Developer** with 5+ years of experience building scalable, user-friendly web applications. Expert in **React.js** and **Next.js**, with a proven track record of translating complex Figma designs into high-performance code. Specialized in integrating cloud-based backends like **Firebase** and **Appwrite** to deliver seamless full-stack experiences.

TECHNICAL SKILLS

- **Languages/Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3.
- **Frameworks/Libraries:** React.js, Next.js, Redux Toolkit, Context API, Zustand, GSAP (Animations)
- **Styling:** Tailwind CSS, Material UI, Chakra UI, Bootstrap.
- **Backend:** Firebase (Firestore/Auth), Appwrite(Database/Storage/Auth), REST APIs.
- **Tools:** Figma, WordPress, WIx.
- **Platform:** Linux, Git, GitHub, Vercel, VS Code.

PROFESSIONAL EXPERIENCE

Frontend Developer (Volunteer) | London Jewish Forum (UK)
January 2026 – Present

- **Engineered** a dynamic **"Pledge Tracker"** for the 2026 London Local Elections, featuring borough-based filtering and interactive data tables to track political candidate support.
- **Refactored** site-wide navigation and headers into a sophisticated multi-row layout, significantly improving mobile responsiveness and user flow.
- **Architected** specialized sub-pages for major events (e.g., *Chanukah in the Square*), integrating complex galleries and document download portals for community manifestos.

- **Collaborated** directly with UK-based stakeholders to translate branding requirements into technical UI refinements, including custom color palettes and optimized typography spacing.

Frontend Developer (Internship) — Achota Limited
June 2024 – July 2025

- Designed, developed, and deployed multiple JavaScript-based, API-driven applications across varying levels of complexity, ensuring scalability and performance.
- Built **r**eusable, visually consistent UI components using modern frameworks and libraries including React, Tailwind CSS, Material UI, and Chakra UI.
- Integrated Firebase Firestore to manage application data, implement secure user authentication, and enable real-time updates, improve overall system efficiency, project maintainability by organizing code structures, and enhancing responsiveness.

PROJECTS

Caped – **E-commerce Web Application**

Developed a modern, responsive e-commerce web application focused on delivering a seamless and visually engaging shopping experience. The platform features dynamic product listings across multiple categories, intuitive navigation, and optimized performance for both desktop and mobile users.

- Built with Next.js, React, TypeScript and Tailwind CSS, ensuring fast load times and scalable architecture.
- Integrated Appwrite for backend services, including product data management and user authentication.
- Developed a secure authentication system with login and signup flows, including session handling and protected routes.
- Implemented state management (Zustand) to handle cart functionality and global application state efficiently.
- Implemented dynamic routing and product detail pages, enabling users to view detailed product information seamlessly.
- Designed and developed responsive UI components with a focus on clean, modern aesthetics and usability.
- Optimized application performance and maintainability through structured code organization and reusable components.

Link: **Caped**

Muhameds – Ecommerce website

- Developed a full-scale e-commerce platform featuring secure checkout and real-time cart management via React, React Context API.
- Built a custom Dark/Light mode toggle system and optimized image assets for faster rendering on low-bandwidth connections.

Link: MedLabs

Jobber – Career Portal

- Built a dynamic job search engine utilizing the Adzuna API for live job listings.
- Developed a custom filtering system (category/location) and a secure employer portal for job postings using a JSON-server architecture.

Link: Jobber

HTC Booking – Travel & Hospitality Platform

- Engineered a high-traffic travel booking SPA using React and Tailwind CSS.
- Integrated TripAdvisor API for dynamic data fetching and Leaflet.js for interactive satellite mapping.
- Implemented complex UI animations using GSAP, enhancing the storytelling aspect of the user journey.

Link: HTC Booking

LightRun – Blogging Platform

- Built a multi-page React application with React Router for fluid navigation and Tailwind CSS for a mobile-first, artistic UI.
- Integrated dynamic data fetching to render articles and implemented a robust search/filter system for content discovery.
