SUMMARY

Seasoned Frontend Developer with proven experience in building functional, responsive, and user-friendly websites using React, Next.js, and modern JavaScript. Highly enthusiastic and driven by a continuous hunger for technology and growth. Known for taking initiative, solving complex challenges, and delivering high-quality results under any circumstance. While I may not know everything, I take pride in making things work efficiently and effectively. Guided by the motto “I Must WIN,” I bring determination, adaptability, and excellence to every project I undertake.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, React-Redux, Next.js, Tailwind CSS, Bootstrap
Others: Visual Studio Code, Git/GitHub, WordPress, Wix, Figma, GSAP, API Integration

WORK EXPERIENCE

Frontend Developer — Achota Limited
Jun 2024 – Jun 2025

- Developed and deployed multiple JavaScript API-driven projects of varying complexity.
- Built visually appealing, reusable UI components using React and Tailwind CSS.
- Collaborated with backend developers to ensure smooth API integration and performance optimization.
- Improved project maintainability by organizing code structures and enhancing responsiveness.

PROJECTS

Jobber – Job Search & Listing App

- React-based job portal integrating the Adzuna API for live job listings and a local JSON server for employer posts. Built with Tailwind CSS and React Router, featuring a fast, responsive UI and clean, reusable component structure.
  Jobber

HTC Booking – Travel Smarter, Explore Further

- Modern React-based travel booking platform integrating the TripAdvisor API to search and compare flights, hotels, car rentals, and attractions in real time. Built with Tailwind CSS, React Router, and optional Framer Motion/GSAP animations for a sleek, interactive experience.
  HTC Booking

LightRun – Blogging Platform

- A React.js-based multi-page blogging platform featuring responsive layouts and intuitive navigation.
  LightRun

Knowledge IDK – Interactive Learning App

- Quiz application developed with ReactJS, designed to test and expand users' general knowledge through an interactive learning experience.
  Knowledge IDK

Woofipedia – Dog Breed Search App

- API-powered web app for exploring and displaying detailed dog breed information.
  Woofipedia

SaaS Product – Scalable Web App

- Developed a responsive SaaS platform with a modern UI, component reusability, and efficient state management.
  SaaS Product

+20 Additional JavaScript Mini Projects (Age Calculator, REM-PX Converter, API demos, etc.) available on GitHub.

EDUCATION

B.Eng. in Computer Engineering
Michael Okpara University of Agriculture, Umudike
Set: 2023/2024 | Graduated: October 7, 2024 | Grade: Second Class Upper
