SUMMARY

Results-driven Frontend Developer with 6 years of experience building scalable, high-performance web applications using **React.js, Next.js, and TypeScript**. Adept at transforming complex Figma designs into pixel-perfect, user-focused interfaces and integrating robust cloud backends like **Firebase and Appwrite** to optimize performance and elevate user engagement.

TECHNICAL SKILLS

- Languages/Core: JavaScript (ES6+), TypeScript, HTML5, CSS3.
- Frameworks/Libraries: React.js, Next.js, Redux Toolkit, Context API, Zustand, GSAP (Animations)
- Styling: Tailwind CSS, Material UI, Chakra UI, Bootstrap.
- Backend: Firebase (Firestore/Auth), Appwrite(Database/Storage/Auth), REST APIs.
- Tools: Figma, WordPress, Wix.
- Platform: Linux, Git, GitHub, Vercel, VS Code.

WORK EXPERIENCE

Freelance, [One View](#) – Photography Portfolio Website June 2026

- Built a high-performance Next.js and Tailwind CSS portfolio featuring an SEO-optimized architecture and a dynamic masonry gallery grid.

London Jewish Forum, Volunteer [London Jewish Forum](#) January 2026

- Designed and developed a responsive website, translating stakeholder requirements into high-fidelity UI components across key organizational sections.
- Optimized site architecture by restructuring navigation layouts and implementing a custom, multi-row menu system to enhance usability.
- Engineered an interactive election data table to streamline candidate tracking and improve overall information accessibility.

Frontend Developer (Internship), Achota Limited June 2024 – July 2025

- Architected scalable, API-driven React applications, engineering a reusable component library with Tailwind CSS/Material UI and integrating Firebase for secure authentication and real-time data synchronization.

Frontend Engineer (Freelance) June 2020 – July 2024

- [Van Marjoli](#) : Built a niche e-commerce marketplace with high-conversion UI and automated inquiry systems for international buyers.
- [KMK Techniques](#) : Engineered a mobile-first, 100% responsive HVAC booking system using a modular component architecture.

PROJECTS

Caped, E-commerce Web Application - [Caped](#)

- **E-commerce Platform:** Architected a high-performance, mobile-first storefront using Next.js, TypeScript, Tailwind CSS, and Shadcn UI.
- **Backend & Security:** Integrated Appwrite for a secure, "backend-less" workflow handling authentication, sessions, and protected admin routing.
- **State Management:** Streamlined real-time cart functionality and UI states using Zustand to reduce boilerplate code.
- **Architecture & UI:** Engineered a modular component library from Figma designs with dynamic routing for SEO-optimized product rendering.

Muhameds, Ecommerce website - [MedLabs](#)

- Developed a full-scale e-commerce platform utilizing React Context API for seamless real-time cart management and secure checkout logic.
- Engineered a custom Dark/Light mode system and optimized asset delivery to ensure high-speed rendering and accessibility on low-bandwidth connections.

Jobber – Career Portal - [Jobber](#)

- Engineered a dynamic job search engine utilizing the Adzuna API for real-time live listings and high-performance data fetching.
- Developed a custom multi-category filtering system and a secure employer portal for job postings, leveraging a JSON-server architecture for efficient data management.

HTC Booking, Travel & Hospitality Platform - [HTC Booking](#)

- Engineered a high-traffic travel booking SPA using React and Tailwind CSS, integrating the TripAdvisor API for real-time dynamic data fetching.
- Implemented interactive Leaflet.js mapping and complex GSAP animations, creating an immersive, "storytelling" user journey with high-performance UI transitions.

EDUCATION

B.Eng. in Computer Engineering

Michael Okpara University of Agriculture, Umudike

Graduated: Oct 2024

- **Grade:** 3.54 / 5.0 (Second Class Upper Division).
- **Engineering Foundation:** Applied core engineering principles to software development, focusing on modular architecture and system efficiency.
- **Extracurriculars:** Engaged with Google Developer Technologies (GDG) on Campus MOUAI, participating in developer circles to master modern web technologies and agile methodologies.
